

## Features

This revolutionary design features a six-shelf collapsible book/utility cart made of lightweight structural plastic that eliminates the need for outdated plywood fixed-shelf book carts and metal utility carts.

Current Market products take up large amounts of valuable floor space, and are industrial in nature.

Samson provides the same utility function with the added benefits of:

- **Green design: Completely recyclable materials without depletion of natural resources;**
- **Replaceable parts;**
- **Lightweight plastic construction, reduces overall weight by 50%**  
(Samson: 96 lbs. vs. Wood: 190 lbs.)
- **Collapsible to reduce storage needs by 50% when not in use;**  
Dimensions: closed= 42" wide x 12.5" deep.
- **Stronger than wood! Each shelf holds 125 lbs!**
- **Ergonomic features developed from field research improve every day use;**
- **Long life-cycle, at least 4-1 over other products;**
- **User safe materials eliminates splinters and other hazards of wood carts;**
- **Washable surfaces provide improved appearance and maintainability;**
- **Cart Dimensions: 42" long x 25" deep (open) x 51" tall.**  
12.5" deep (closed)
- **Facility friendly design to reduce damage to walls and doors.**
